Ipeps+ 2.09 Release Note

Scope

Part of the ADDERLink® ipeps range, the ipeps+ enables you to remotely access and control your critical computing hardware using your standard IP network. Using RealVNC client software, computers outside the network can be remotely and securely accessed.

This maintenance release allows users to change the Display Name of the IPEPS+ when viewed in the Operating System's display settings.

Parts affected

IPEPS-PLUSs

Previous version

This Release Note details the changes between previous version: v2.07

Reason for Release

Release to add ability to change unit display name.
